Sustainable & Innovative Solutions

Industry Driven Development

Quality and Functionality

Riga Wood birch plywood products are developed with a focus on quality and targeted applications, bearing in mind the specifics of each industry. Due to its technical properties, our birch plywood combines functionality with endurance and aesthetic visual appearance. By applying various overlays and processing techniques, its application options expand, allowing one to realise even the most ambitious of projects.

Riga **ECO**logical

Riga Wood goes a step further and offers to customers Birch Plywood bonded with environmentally friendly resin RIGA ECOlogical, where bio-based renewable lignin is used to replace the traditional fossil phenol – a step in line with growing demand for green and sustainable product solutions without compromising technical performance.

*Quality meeting
requirements
of technically
demanding
industries*

Diversity in Applications, Consistency in Quality

High Level Performance & Durability

01

Heavy Building

Strength and durability ease the construction process, helping to achieve qualitative results

02

Light Building

Functionality is combined with appealing visual appearance in indoor and outdoor solutions

03

Road Transport

From highly wear resistant floors of Heavy Trailers to customised interior solutions of Trucks and Vans

04

Sea Transport

Maintains its strength and original dimensions even at extremely low temperatures, thereby meeting the needs of technically demanding LNG tanker industry

Diversity in Applications, Consistency in Quality

High Level Performance & Durability

05

Rail Transport

Effective sound insulation in passenger wagons and heavy duty performance in cargo wagons

06

Air Transport

Applicable for production of premium quality flight cases where functionality, resistance and light weight must be combined with aesthetics

07

Packaging

From technical to elegant packaging solutions for multiple industries

08

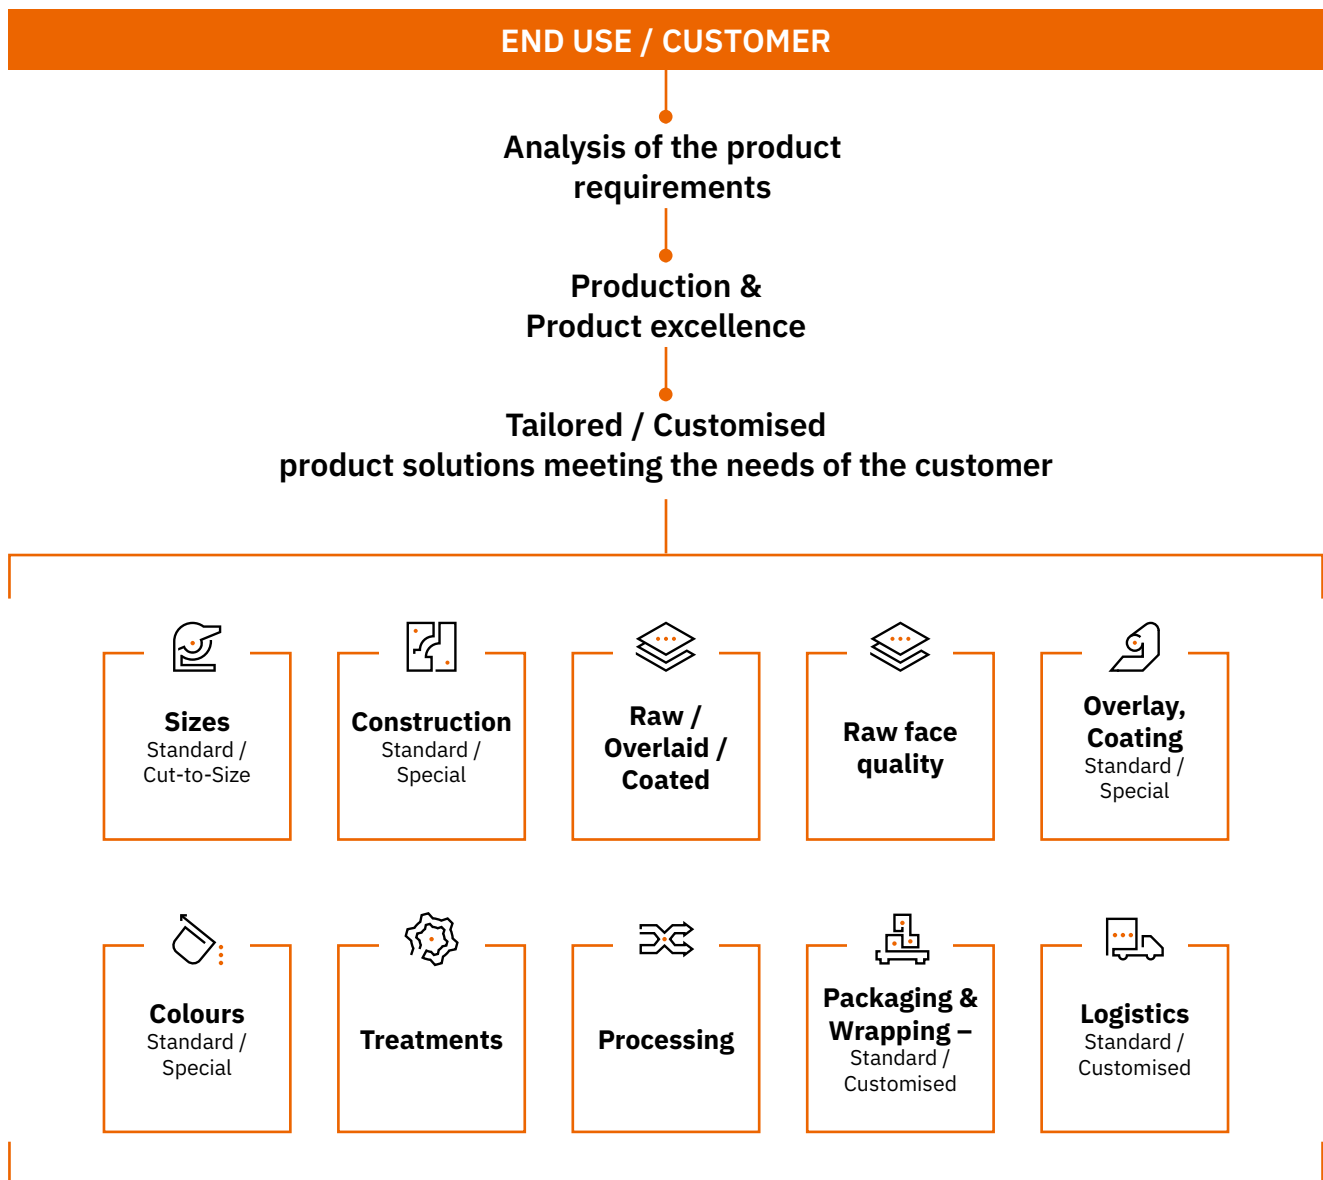

Wholesale & Distribution

Our wide range of products and services enable our distribution partners to satisfy the most demanding requirements of their industrial and commercial customers

Individual Approach & Forward-looking Solutions

At Latvijas Finieris, we are driven by excellence and inspired by mutual development. The broad competence accumulated through the decades, allows our team of experts to choose the best solutions for each project in close cooperation with customers.

*Tailored and
customised
products and
services meeting our
customers' needs*

Supporting Circular Economy

Land is our treasure and our duty is to ensure that our entrepreneurship supports circular economy along our entire supply chain. Developing long-term sustainable solutions preserving biodiversity and securing a safe living and working environment, are among our top priorities.

We follow strict measurements within entire supply and production chain, assuring the life cycle of raw material, products and side streams is extended. Our team respects the natural balance of local flora and fauna, therefore plan and carry out the operations accordingly. We make sure the raw material is harvested in manner safeguarding biodiversity and retaining functioning of ecosystem – by

reducing damage to soil, future crop trees, residual stands and more. By choosing cooperation partners with the same values as we do, we ensure and promote sustainable business practices.

Efficient and innovative use of resources are among our driving forces, aligned with the goals of The European Green Deal.

Legal, traceable and controllable sources of raw materials

Biodiversity preservation

Sustainable logistics solutions

Effective and innovative use of side streams

Switching to environmentally friendly varnishes

Securing a safe living and working environment

Sustainable solutions
along the entire
value chain

With Social Responsibility in Mind

Latvijas Finieris Group acknowledges the importance of social and environmental concerns within its entire Group's activities. Implementing innovative solutions supporting sustainable practices, growing birch saplings, developing new technologies and educating society about forestry and forest products, are among the activities that allow us to keep balance between entrepreneurship, society and environment.

Knowledge accumulated through decades and a passion for what we do has led us to where we are now. Therefore, we have chosen to be active in our communities by educating people of all ages on forestry and promoting green living through various educational programmes and public tree planting projects. Our employees are the ones

who create the whole culture of the Group and serve as ambassadors of our four core values – safety, respect, development and leadership – reflecting them in the attitude towards our customers and society as a whole. Our responsibility is to provide a safe and inspiring work environment for them.

Giving back to our society

Safety for our employees & their families

Educational programmes for all ages

Support for social initiatives

Public tree planting projects

Excellence in actions
